

## **Assignment on Corel Draw**

**Design a professional event flyer for a "Creative Arts Exhibition" using CorelDRAW. Your flyer must be A4-sized and should include the following elements:**

1. **Title Text** – Use the **Text Tool** to add the event title "Creative Arts Exhibition 2025" at the top of the flyer. Apply appropriate **font style, size, alignment, and text effects** (e.g., drop shadow or contour).
2. **Shapes and Layout Design** – Use different **basic shapes** (rectangle, ellipse, polygon, star) and the **Shape Tool** to create background designs, borders, and section dividers. Apply **fill colors, gradients, transparency, and outline effects**.
3. **Images** – Import at least **two images** (e.g., painting or sculpture) using the **Import Tool**. Resize and position them using the **Pick Tool**. Use the **PowerClip feature** to place one image inside a shape.
4. **Color Management** – Apply a consistent **color scheme** across your design using the **Color Palette** and **Eyedropper Tool**. Experiment with **fountain fills** and **custom color fills**.
5. **Text Formatting** – Add **event details** like date, time, venue, and contact using well-aligned, properly spaced **paragraph text**. Use the **Text Tool, Text alignment options, and bullet or numbering** if necessary.
6. **Use of Layers** – Organize elements on **different layers** (e.g., background, text, images) for easy editing and clarity.
7. **Object Arrangement** – Apply **arrangement tools** like **grouping, aligning, ordering (send to back/front), and distribute** to structure your elements effectively.
8. **Special Effects** – Add at least one special effect such as **drop shadow, transparency, or blend** to enhance the visual appeal.
9. **Save and Export** – Save your project in **.CDR format** and export a copy as a **PDF or JPG** ready for print or online sharing.
